

AluTruk Designed For White Goods Deliveries

Product code: M22Y10SGWG

This sack truck supports up to 300 kg loads with its robust anodised aluminium lattice frame with nylon6 cross members! The twin grips handles give you full control when the load is tilted back and assist with getting the product to wherever it needs to go! For added support and prevention from rain water splashing onto the packaging we fit wheel guards to the Sack truck! To help with kerbs, thresholds and stairs, this unit comes with stair glides. We make it easier to get over the stairs and kerbs (and help to protect them) by fitting the stair glides with skid strips, made of low-friction polymers. Worried about punctures? This AluTruk comes complete with puncture proof tyres with precision bearings for a smooth ride when under load!

Load capacity	300kg
Height	1240mm
Width	510mm
Length	500mm
Material	Aluminium
Industry	White goods delivery
Brand	Alutruk
