

AluTruk Keg Handling Sack Truck - Basic Model

Product code: NS25YR10WGKH

Introducing our core model of keg handling sack truck without the extras! A simple yet durable design to make moving and locating beer kegs easier and safer. With a combination of its curved back frame and keg hook assembly, locating kegs securely to the sack truck is simple providing stability and ease of use. Control of the sack truck under load is maintained using a dual grip handle design giving the user the confidence when on the move. The puncture proof wheels provide durability and peace of mind and are fitted with precision bearings creating a smooth ride when under load. Additionally concerns about load support and unwanted rain splash back are avoided with the addition of lightweight wheel guards. These are combined with an extruded aluminium designed base plate that provides added durability in comparison to many cast foot plates on the market that crack due to poor material design. Compatible with 9 gallons (firkin); 10 gallons; 11gallons (50litres); 18 gallons (kilderkin) and 22 gallons (100 litres)

Load capacity	300kg
Height	1310mm
Width	510mm
Length	460mm
Material	Aluminium
Industry	Brewery / keg handling
Brand	Alutruk
