

High Lift Pallet Truck - Electric HX10E 1150x680

Product code: EE0440V0000

The HX10E is an electric scissor lift for loads up to 1000kg, with a height-adjustable stable platform with a 400–800mm height range, this unit delivers a stable working surface that minimises operator strain when loading and unloading palletised goods.

Load capacity: up to 1000kg.

Ergonomically-designed tiller with an optimised shape to push loads with maximum efficiency without fatigue, thanks to large grasping side areas specially designed to promote correct positioning during operation of the truck.

The battery box design provides ample foot clearance, ensuring operators can move freely and naturally around the truck without obstruction.

Highly visible emergency push button acts as a battery cut-off switch, promoting safe use. The safety limit switch device protects against overpressure of oil.

Polyurethane rollers and rubber steering wheels.

Optional: The scissor lift can be provided with a precise and intuitive scale device to allow the machine to be used not only to handle and move goods, but also to weight them, making it functional in all internal weighing operations.

Optional: Auto-Level system (also available as retrofit). The Auto-Level system adjusts the height of the forks and maintains the desired working height.

The Auto-Level and Scale systems can be combined for enhanced efficiency, safety and ergonomics.

- 15V 60Ah starter battery. On-board battery charger with frontal IEC plug. Battery status indicator visible from the manoeuvring station. Battery options:
 - Gel battery - 12v 50Ah: particularly stable for deep cycle applications, gel battery is safe and requires no maintenance.
 - Lithium battery - 24V 30Ah: maintenance-free, with a long life. Quick opportunity charged supported without impairing the battery service life.

Load Capacity (kg)	1000
Drive	Manual
Total length (mm)	1665
Wheel Material	Polyurethane & Rubber
