

High Lift Pallet Truck HX10M 1150X680

Product code: TT0440VY100

The HX10M is a fully manual height-adjustable scissor lift platform with a 400–800mm range, this unit delivers a stable working surface that minimises operator strain when loading and unloading palletised goods.

- Load capacity: up to 1000kg.
- Ergonomically-designed tiller with an optimised shape to push loads with maximum efficiency without fatigue, thanks to large grasping side areas specially designed to promote correct positioning during operation of the truck.
- Resistant and reliable one-piece cast iron housing to protect all components, reducing accidental damage. Pump housing processed with CNC machines to achieve high precision tolerances and high accuracy.
- Chromed piston rod and oil seal prevents rust and oil leakage during use.
- Steel tank is highly resistant, strong and durable.
- Maximum pressure valve protects the transpallet against overloading.
- Proportional lowering valve allows for precise control of lowering speed according to the lever position on the tiller, providing the perfect tool for carrying fragile or delicate loads such as crystal, glass or ceramics.
- Polyurethane steering wheels and rollers as standard; rubber steering wheels available as an option.
- Front and rear stabilisers provide safe and stable function.

Load Capacity (kg)	1000
Drive	Manual
Total length (mm)	1545
Wheel Material	Nylon polyurethane
Weight (kg)	104
Lift height (mm)	800
Width (mm)	680
Height (lowered) (mm)	85
Turning Radius (mm)	1440
Ground clearance (mm)	21
Brand	Pramac
